MoMo	Wait until the customer's phone shows success → MOMO → transaction ID → Complete payment
Card	Wait until the card machine approves → CARD → slip reference → Complete payment
Split	SPLIT → method + Amount for this payment → Record this payment → repeat
Receipt	Print receipt
Food handed over	Served (table) or Picked up (takeaway)
Kitchen screen	START → READY → BUMP (clear). RECALL brings a ticket back.
Close register	Close register → Count the cash → Actual cash counted → Review → Close register → Export → PDF
No internet (online mode)	Keep the order open; press Retry send when it's back. Nothing is sent twice.
Restart a device	Just restart. It stays paired.
Printer not printing	Paper? Power? Cable? → printing PC on, and MY FOOD Printing says Printing is on? → tell a manager
Wrong PIN 5 times	Wait 10 minutes, or ask a manager to Reset PIN

Pairing a device (managers)

1. On the device: open www.chefelisha.cc/pair. It shows a code like **K7M4-Q2RT**.
2. On your phone: **Devices & printing** → **that device's row** → **Enter code from device** → type the code → **Pair device**.
3. The device continues by itself.

STOP before making new codes. If the code is still on the screen, it still works.

- A code **from a device** goes on **that device's row** (**Enter code from device**).
- A code from **Create code** is typed **on the device** (**I have a code from a manager**).
- **MY FOOD Printing** codes go only on **PRINT-AGENT-01**. **Hub** codes go only on the **Hub** row.
